1. Introduction

This document is the specification of the <ip_name> ...

This document describes the functions, performance characteristics and required verification tests for the <ip_name> ...

2. Version History

[IPOS_IPNAME_20200201] Definition

Current Version	Previous Version	Date	Author	Change description

Table 1 - Revision Hystory

[End]

3. Reference documents

This is a list of reference documents.

[IPOS_IPNAME_20220301] Definition

Current Version	Previous Version	Document	Date	Author	Change description

Table 2 Reference documents

[End]

4. Conventions

[IPOS_IPNAME_20200301] Definition

If not otherwise noted, specification values are valid ...

[End]

4.1. Glossary

[IPOS_IPNAME_20200302] Comment

The following abbreviations are used throughout this document:

[End]

[IPOS_IPNAME_20200303] Definition

$g_N = 9.81 \text{ m/s}^2$
 Equation 1 - Acceleration

[End]

[IPOS_IPNAME_20200304] Definition

Term	Definition
AVDD	Main analog supply
BIST	Built-In Self-Test
DDS	Digital Design Specification
FSM	Finite State Machine
IP	Intellectual Property block
MCU	Embedded microcontroller unit
NVM	Non-Volatile Memory
PDN	Power Delivery Network
POR	Power-On Reset
RCCU	Reset & Clock Control Unit
CRS	Clock Recovery System

[End]

[IPOS_IPNAME_20200305] Definition

Category Convention:

Comment: This category denotes that the content of the object text is a general comment. For example, this may be an explanation why the requirement demands certain items when there would also be other possibilities. A comment should not be necessary to understand the related requirements.

Definition: This category is used for the definition of terms, wordings, technical expressions etc. It is a documentation of design decisions and general instructions that belong to the document itself, e.g. owner of the document, structure of the document. It is needed to understand a related requirement. It is not linked to any test case.

Assumption

This category is used for requirements this document provide upstream to another document, indicating what this IP/block/system needs to work properly.

Requirement:

This category denotes a requirement that has to be implemented and verified. Accordingly, it is necessary to establish traces from the different requirement levels to the test cases for this category.

[End]

5. Description of the IP

The IP is a ... (describe what is the product)

The IP is intended for the use in ... (describe the intent of use) and designed for use in ...

6. Symbol

[IPOS_IPNAME_20200501] Definition

Figure 1 – Symbol

[End]

7. I/O List

[IPOS_IPNAME_20200601] Definition

Name	Type	I/O Capa	Fan-Out Max

Tableau 1 - I/O List

[End]

8. Block Diagram

[IPOS_IPNAME_20200701] Definition

Figure 2 – Block Diagram

[End]

9. Cell Programming

[IPOS_IPNAME_20200809] Requirement

All this paragraph will be loaded as textual requirement (table included)

Attribute	Physical Significance	Range	Default Value

Covers: xxxxxx

[End]

10. Additional Information

[IPOS_IPNAME_20200901] Requirement

Hysteresis shall be

O=1: Threshold is got for PI=MI

O=0: Threshold is got for PI=MI-Hyst

Covers: xxxxxx

[End]

[IPOS_IPNAME_20200801] Description

PDN input shall be a pin indicating the power down state.

[End]

[IPOS_IPNAME_20200902] Requirement

PDN input shall be active (stand-by mode) at low state.

[End]

11. Electrical characteristics

[IPOS_IPNAME_20201001] Requirement

All this paragraph will be loaded as textual requirement, moreover attributes will be defined for the requirement.

[Covers: SR_QM01]

Note:

This is a requirement. Table shall have one raw only.

ID	Parameter	Name	Conditions	min	typ	max	minFT	maxFT	unit
IPOS_IPNAME_20201001_01	Delay	Delay	Driver delay	0.08	0.21	1.00	0.68	0.88	us

Covers: xxxxxx

[End]

[IPOS_IPNAME_20201002] Requirement

All this paragraph will be loaded as textual requirement, moreover attributes will be defined for the requirement.

[Covers: SR_QM01]

Note:

This is a macro requirement. All parameters of a macro requirement shall be in one table.

ID	Parameter	Name	Conditions	min	typ	max	minFT	maxFT	unit
IPOS_IPNAME_20201002_01	Delay	Delay	10Hz Rate Input	0.08	0.21	1.00	0.91	1.99	us
IPOS_IPNAME_20201002_02	Rise Time	Time	From 0 to vcc	1	2	3	0.81	2.00	us

[End]
